

IPsec VPN Executive Security Report

Analysis ID: sess_20260901_53fdbb | Generated: 2026-09-01T12:08:04

Security Score: 59 / 100 (CRITICAL)

Risk Score: 61 / 100 (HIGH RISK)

VPN Protocol: IPsec IKEv2 (Tunnel Mode)

Key Executive Findings:

- [HIGH] Weak Diffie-Hellman Group: Upgrade DH Group immediately to MODP-2048 or ECP-384
- [LOW] CBC Cipher Mode Utilization: Transition to AEAD mode such as AES-128-GCM or AES-256-GCM
- [INFO] Unencrypted Endpoint IP Metadata: Consider routing traffic through an anonymizing gateway or overlay if required
